Caribbean BluEFin Project Brief

Scaling sustainable blue economy solutions across the Caribbean

Quarterly Newsletter
Issue 1
July 2026

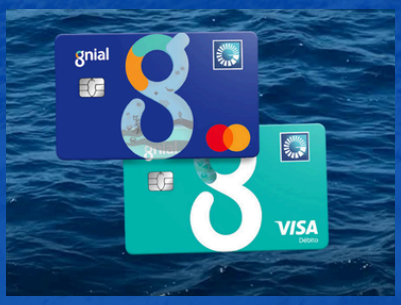
In partnership with the St. Lucia National Conservation Fund (SLUNCF) and the St. Vincent and the Grenadines Conservation Fund (SVGCF), we have signed new agreements to implement and strengthen Digital Payment Systems (DPS) in the Soufrière Marine Management Area (SMMA) in St. Lucia and the Tobago Cays Marine Park (TCMP) in St. Vincent and the Grenadines. Learn more here.

The first of two iterative International Waters (IW): LEARN Twinning Exchanges on sustainable financing was held between the Caribbean Biodiversity Fund (CBF) and the Amazon Cooperation Treaty Organization (ACTO) in Brasilia, Brazil. This critical peer-to-peer event focused on knowledge sharing and capacity building in conservation financing. Find out more here.

We successfully delivered capacity-building workshops on the Caribbean Blue Economy Hub across The Bahamas, the Dominican Republic, St. Lucia, Grenada, and St. Vincent and the Grenadines. The workshops, developed in collaboration with Ernst and Young (EY), brought together entrepreneurs, private sector, non-government, and government stakeholders to strengthen their capacity to access financing. Read more here.

We continue to support regional knowledge sharing, stakeholder engagement, and the replication of Caribbean Blue Economy Finance approaches across participating countries. Fact sheets, posters and educational videos are being developed as resources which will support the scaling, knowledge, and awareness of the blue economy. View here.



Our partnership with Banco Popular Dominicano establishes a framework to explore financing solutions that support the sustainable blue economy while contributing to the conservation and sustainable management of marine and coastal ecosystems in the Dominican Republic. See details here.
